1105 Uluopihi Loop
Kailua HI, 96734, United States

LOC_01

KMO_SAMPLE_01
DU5000

General Features

Flowers	Hawaii	-	02Apr2026
Crop	*Location*	*Soil Type*	*Date*

Summary

Selected BeCrop index to be improved

Here you will find the highest impact improvement opportunities.

Soil
Biosustainability
47
MEDIUM

NUTRITION — LOW

Global nitrogen

STRESS MANAG. & HORMONE PROD. — VERY LOW

Global microbial phytohormone production

LOW

Global stress adaptation

Microbiome Analysis Report

All the information shown in this microbial report is based on the detection presence of *681* different species

1e+10 units/gr
Total Bacteria

1e+7 units/gr
Total Fungi

Only Ectomycorrhiza
Arbuscular-Ectomycorrhiza Ratio

1:302
Fungi-Bacterial Ratio

Health

HEALTH
VERY HIGH

Crop health according to the pathogens detected

Not Detected

ARMILLARIA ROOT ROT • BACTERIAL SPOT • BLACK SPOT • BOTRYTIS BLIGHT • CROWN GALL • DAMPING OFF • DOWNY MILDEW • PHYTOPHTHORA ROOT AND CROWN ROT • POWDERY MILDEW • STEM CANKER

Biocontrol

FUNGICIDE AGENTS	MEDIUM	BACTERICIDE AGENTS	NOT DETECTED
INSECTICIDE AGENTS	LOW	NEMATICIDE AGENTS	VERY HIGH

BC-R-Test-ITS3-16S4-BPP4.0-2026-04-13-DU5000-2/4

HORMONE PRODUCTION

VERY LOW

3 Detected

Microbial phytohormone potential based on Microbial species detected

AUXIN PRODUCTION

CELL DIVISION | STEM ELONGATION

VERY LOW

GIBBERELLIN PRODUCTION

STEM ELONGATION | GERMINATION | FLOWERING

LOW

CYTOKININ PRODUCTION

CELL PROLIFERATION | CELL DIFFERENTIATION

MEDIUM

STRESS ADAPTATION

LOW

7 Detected

Microbial species grouped according to their relationship with the metabolisms linked to the capability to withstand stress conditions

EXOPOLYSACCHARIDE PRODUCTION

NUTRIENT TRAP | SALINITY PROTECT. | DROUGHT PROTECT.

VERY LOW

HEAVY METAL RESISTANCE

BIOREMEDIATION | DETOXIFICATION | ALLEVIATE HEAVY METAL STRESS

VERY LOW

SALT TOLERANCE

SALINITY PROTECT. | ROOT GROWTH PROMOTION

LOW

SIDEROPHORE PRODUCTION

IRON AVAILABILITY | BIOFERTILIZER

MEDIUM

ACC DEAMINASE

PATHOGEN PROTECT. | SALINITY PROTECT. | DROUGHT PROTECT.

MEDIUM

SALICYLIC ACID

DROUGHT PROTECT. | SALINITY PROTECT. | ALLEVIATE HEAVY METAL STRESS

MEDIUM

ABSCISIC ACID

GROWTH REGULATION | PLANT RESISTANCE | INCREASE YIELDS

HIGH

BC-R-Test-ITS3-16S4-BPP4.0-2026-04-13-DU5000-3/4

Nutrition

Nutritional status based on the microbial mobilization of certain compounds

Major Compounds

C Carbon — HIGH

PATHWAYS

GAIN

CARBON FIXATION	HIGH
ORGANIC COMPOUNDS DEGRADATION	MEDIUM

LOSS

AEROBIC RESPIRATION	LOW
FERMENTATION	MEDIUM
METHANOGENESIS	MEDIUM

N Nitrogen — LOW

PATHWAYS

GAIN

GAIN OF NITROGEN FROM GAS	MEDIUM
GAIN OF NITROGEN TO AMMONIA	LOW
GAIN OF NITROGEN TO NITRATE	LOW

LOSS

LOSS OF NITROGEN TO GAS	MEDIUM
LOSS OF UREA BY VOLATILIZATION	MEDIUM
LOSS OF NITROGEN TO BIOMASS	VERY HIGH

P Phosphorus — MEDIUM

PATHWAYS

NUTRIENT SUPPLY

INORGANIC P SOLUBILIZATION	MEDIUM

NUTRIENT COMPETITION

INORGANIC P CONSUMPTION	MEDIUM

K Potassium — HIGH

PATHWAYS

NUTRIENT SUPPLY

POTASSIUM EXPORT	LOW

NUTRIENT COMPETITION

POTASSIUM CONSUMPTION	LOW

Minor Compounds

Fe Iron — MEDIUM
Iron assimilation

Zn Zinc — VERY LOW
Zinc transport equilibrium

Mn Manganese — VERY HIGH
Manganese transport equilibrium

S Sulfur — HIGH
Sulfur cycle equilibrium

Ca Calcium — HIGH
Calcium transport

Cu Copper — HIGH
Copper export

Mg Magnesium — VERY LOW
Magnesium transport

Cl Chlorine — HIGH
Chlorine transport
